Onsite

*You manage it.
We power it.*

- No upfront device costs.
- No disposables.
- Run your program your way.

Two models so you can choose the approach that works best for your team, your patients, and your growth strategy.

Direct

We take the burden off your team.

**More Nights.
Lower Costs.
Greater Scale.**

- No shipping. No setup.
- No added workload.
- Just faster testing and accelerated growth.

Are you missing 1 in 4 OSA patients?

Single night testing misses over 25% of patients with $AHI \geq 15$ compared to three nights of diagnostic testing with EnsoHST.

One night of testing is only a snapshot of your patient's sleep health.

Multi-night testing with EnsoHST gives you a more complete and accurate clinical picture.
